

Rapid Response Blanket

All-Purpose Tactical Rescue Tool

The Kovenex® Rapid Response Blanket is a high-performance, flame- and tear-resistant blanket used by extrication professionals and fire rescue teams. Tested to National Fire Protection Association (NFPA) standards, Kovenex far surpasses the performance of treated wool blankets, refusing to burn or tear. It will provide you and your rescue victims the needed protection against fire, intense heat and burn, shattered glass particles and sharp metal edges.

Fabric Weight:
10-12 oz./sq. yd.

Blanket Size:
58" x 73"

Other sizes and weights available

Safer

Patented, high-performance fabric resists fire and tear, protecting you and your rescue victims against open flames, shattered glass and sharp objects.

Easier

Kovenex blankets are lightweight, yet durable, engineered to smother fire or wrap around a rescue victim for protection against burn and flying debris.

More Effective

Tested to NFPA standards, Kovenex's heat blocking capabilities prevent contact burns, setting it apart from other fire protection blankets.

Rapid Response Blanket

Professionally Tested

The Kovenex Rapid Response Blanket has been thoroughly tested to the standards of the NFPA. Results demonstrated that Kovenex not only was far superior than the traditional fire retardant wool blanket, but it delivered breakthrough performance in flame resistance and heat blocking.

Test 1 Results: Thermal Protective Performance (TPP)

The Kovenex Rapid Response Blanket measured a TPP value of approximately 20. When folded over, it more than doubled the TPP rating. Exposure to the radiant/convective heat source only blackened the Kovenex test swatch, while the traditional fire retardant wool blanket flamed and melted away.

Test 2 Results: Heat and Thermal Shrinkage

When placed in a 500°F (260°C) chamber for five minutes, the Kovenex Rapid Response Blanket only became slightly discolored with minor shrinkage. In comparison, the traditional wool blanket smoked heavily, was blackened and virtually disintegrated when removed from the chamber.

Test 3 Results: Vertical Flame Resistance

The test measured burn time and flammability when a swatch of fabric is exposed to 1.5 inch high vertical flame for 12 seconds. Under these conditions, the Kovenex Rapid Response Blanket refused to burn and showed no signs of melting or dripping. The traditional wool rescue blanket burned furiously and had to be extinguished.

Proven In the Field

“Kovenex is an excellent product with a variety of uses in the rescue field. Affordable, durable, and backed by outstanding customer service.”

Battalion Chief Eric Taylor
Lady’s Island, SC, Fire District

“An extremely lightweight rescue tool that provides very impressive protection against sharps and vehicle debris.”

Ret. Chief Marvin McCammon
Active Chairman – T.E.R.C.

The Kovenex Rapid Response Blanket is engineered and manufactured by Waubridge Specialty Fabrics, LLC.
